## About

Fourth year Informatics student with skills in both programming and business development. Participated in several successful projects tied to both areas. Experience includes assisting in research and teaching at university level.

## Experience

### University of Oslo

**Research Assistant** | August 2024 - Present

Assisting Associate Professor Lena Hylving with various research tasks, including conducting interviews, performing literature reviews, analyzing data, and contributing to academic writing. Currently working on an article about gamification, using inductive reasoning based on collected data and existing research.

**Teaching Assistant** | January 2023 - Present

Teaching "INEC1821: Digital economy, organization, and leadership," where I hold two weekly lectures and review mandatory assignments. The subject covers accounting, digitalization and organizational management. I incorporate case-based teaching, which has been effective in fostering active student engagement.

### DNB - Corporate Banking

**Seasonal Associate** | May 2022 - December 2022

Worked on a large project as part of a 30 people team, where I assisted corporate clients in getting their documentation in order and filling in missing information. The work included document handling and guidance via email or phone.

## Projects

### Weather App

As part of a course at the university, I was part of a team of six that developed a weather app tailored for the visually impaired. This was done using Kotlin and Android Studio.

### Strategy Project: Fjord Miljø

Two fellow students and I developed a series of strategic recommendations for a small and innovative company called Fjord Miljø. The work involved analysis, interviews, and evaluation of strategic alternatives.

### Portfolio Website [Link](#)

Developed and designed a personal portfolio website to showcase my skills, projects, and experiences. The main goal was to gain more experience using HTML, CSS, and JavaScript.

## Education

### University of Oslo | 2021 - 2026

**Master's in Informatics: Digital Economics and Leadership** | 2024 - 2026

The "Informatics: Digital Economy and Leadership" program has a dual focus on IT and business development. For example I am taking five courses this semester. These are in programming, algorithms, mathematics, business development, and digital ecosystems.

**Bachelor's in Informatics: Digital Economics and Leadership** | 2021 - 2024

Like the master's program, the bachelor's program focuses on both IT and business development.

**Exchange** | 2024 - 2024 - 6. semester

Sapienza Università di Roma.

## Volunteer Work

### Digitus

**Board Member** | June 2023 - December 2023

Digitus is the association for our study program at the University of Oslo. I was responsible for organizing academic and social events.
